JOHNSONS CLASSIC PICK-UPS

Rollbanner Aluminium endcap 85 cm

Articlenumber	**CYDRS-85**
Banner size	**850 x 2000 mm**
Visible size banner	**850 x 1970 mm**
Casing width	**870 mm**

The rollbanner is supplied without printed foil in a firm carrying bag. The system contains an aluminium casing with a self wind up rollsystem, two turnable footpieces, bannertube consisting of three lengths and a poster clamp profile at the top side.

On the side of the footpiece there is a safetypin that prevents the banner from rolling up with high speed back into the casing. Pull this pin out but keep it within arm's reach. Pull the white foilstrip out of the casing. Put the pin back into the casing.

At the top edge of the white foilstrip is a gummed label where you can paste your printed banner. Please make sure you paste the poster as straight as possible. That way the banner will roll up as best as possible.

Make sure someone else holds the top profile piece very carefully when you remove the safety pin after your banner is placed. The system is fiercely rolled up so the banner will shoot back into the casing when the topside piece isn't held back.

Next you remove the cover caps of the clamp profile of the top side piece.

Click the profile piece open and clamp the poster in the profile piece. When finished you can remove the pin and let the banner gently rolling up inside the casing. PLEASE READ THE WARNING IN THE RED SQUARE.

Slide the 3 way piece of the tube into each other and subsequently in the hole in the casing. On the top side you clamp the profile piece over the tube.

This product is sold without guarantee and printing foil.
