PRODUCT INFORMATION OCEAN MAXI FRAME

Articlenumber **UMFO002020**
Outer dimension **2000 x 2000 mm**
Extra profilepiece H **Not necessary**

Oversized frame, suitable for large showrooms or for use during a tradeshow. Several footpieces are available for stable placement. 45 x 45 mm profile thickness. For larger sizes a H profile is needed for stability of the frame.

You have to stitch your printed fabric material on the backside together with the supplied silicone strip before you can slide the strip into the frame. We supply the frame without fabric or footpieces, which are sold separately. Please keep in mind that you have to stitch the "Pull" strip together with the seam of the fabric material. With this strip you can easily pull out the fabric material out of the profile. The fabric material cannot be thicker than 0,5 mm because it won't be possible to slide the fabric with the silicone strip in the frame. 13 mm around the corners of the fabric will be slid into the frame so the visible size of your visual will be 26 mm on both sides less.

It isn't possible to derive any rights from this information. Sizes can vary. Printer's-, compositor's- and misprint errors reserved.
