PRODUCT INFORMATION POSTERTRAP

Articlenumber
System width

UMS0000800
800 mm

The Postertrap is an economical and practical sign. It comes in two parts which can be assembled together by using screws. First your PVC foam board has to be drilled two times in order to be screwed together. We advise to make 9 or 10 mm diameter holes.

Made from powdercoated steelplate, these parts are perfectly suited to hold many boardsizes. The complete system is 400 mm wide and supports board sizes till max. 1.50 mtrs high (indoor use). We advise and supply 1 mtr high board. The two Postertrap parts are silver anodised and can be lettered just fine.
