

PRODUCT INFORMATION EASY SWAP

Articlenumber **UMS0100600**
System width **610 mm**
Max. width board **600 mm**

Economical and easy to use alternative pavement sign. Your 5 - 10 mm thick PVC foam board is placed in the clamping system. Subsequently you turn the nut on the bottom side so the clamps are screwed against the plate.

The Easy Swap is 200 mm wide and because of that the Easy Swap can be maximized burdened with a 1.20 mtrs high board. Bigger size boards cause insufficient stability, especially outside, because of which the Easy Swap will fall down instantly. We advise a maximum 1 mtrs high board to use and place the Easy Swap out of the wind.
